

CENTER OF REPRODUCTIVE MEDICINE, LUCERNE

The Center of Reproductive Medicine at the Cantonal Hospital of Lucerne, Switzerland, offers a full-time position for an experienced embryologist, starting from April 2019.

Our laboratory performs all techniques of ART and cryopreservation including TESE and ovarian tissue. We run a busy fertility preservation programme. Our laboratory is ISO 9001:2015 certified and about to implement an even higher quality standard. The lab is protected by an electronic witnessing system. The equipment is up to date including time-lapse.

The preferred candidate should be experienced with quality management systems and has good verbal and written communication skills in German and/or English. Experience with trophoctoderm biopsy is an asset. An ESHRE certification as a senior clinical embryologist or a master degree in embryology is mandatory.

Lucerne is the cultural capital of central Switzerland with a high quality of living.

Interested candidates please forward your CV to: juergen.weiss@luks.ch and in copy to graziella.bracone@luks.ch All inquiries will be considered strictly confidential.
