## SWICE Scientific Workshop "The ins and outs of insemination" September 26, 2024 | Virtual Workshop | 14:00 – 16:00

Exploring new methodologies is always beneficial. However, what about the tried-and-true methods we use daily? Is there room for improvement?

We are pleased to invite you to the Virtual SWICE Scientific Workshop on the ins and outs of ICSI and IVF, presented by Embryologist Celine Leyvraz Recrosio and Laboratory Manager Romualdo Sciorio scheduled for September the 26th online via Zoom.

Join our virtual workshop to exchange insights and evaluate potential enhancements to our IVF and ICSI procedures. The session will conclude with virtual breakout rooms.

For the final segment we would encourage to have both your microphone and camera switched to be able to fully engage with this opportunity.

### VIRTUAL WORKSHOP

**Topic: The ins and outs of insemination**

14:00 - 14:05	Welcome <b>Ana Martins, SWICE board President</b>
